About TDI Engineering, LLC:

TDI provides a wide range of CIVIL ENGINEERING services relating to land development. These services are offered to clients for the entire timeline of a project, beginning with feasibility and conceptual planning procedures to production of construction documents, and through construction and acceptance of the project. Our professional Civil Engineers have extensive experience assisting local, national, and public sector clients. Some of these clients have included the City of Buda, City of San Marcos, Randall’s, Super S, Firestone, Ace Hardware, and Olive Garden Restaurants. In addition to large developers and agencies, we have provided tailored design services to numerous private individuals and smaller developers. Such services include subdivision planning, tap plans, grading plans, and guidance through the sometimes-complex procedures of regulatory agencies.
